## 1 Limericks

There once was a language called Java.  
I used it to code with bravada.  
I made objects and classes,  
while wearing my glasses  
and wrote code as fire as lava.

Java exceptions are many.  
We've all seen null pointer plenty.  
I think runtime's the worst,  
sometimes I feel cursed.  
I'd be happy if I never saw any.
